

TIRAWAT PISUT

Address: Bang Samak, Bang Pakong, Chachoengsao 24180
Phone: 083-440-9604
Email: tirawat.cod01@gmail.com
GitHub: github.com/Coachzas

PROFILE SUMMARY

A fresh Computer Science graduate who is passionate about software development and automation systems. Skilled in building full-stack web applications using JavaScript, Node.js, React, and PostgreSQL. Experienced in creating company chat web apps and automated email systems with AI text reading. A team player who knows how to use modern tools like Git and Docker, and is eager to help the team solve problems efficiently.

EDUCATION

- COMPUTER SCIENCE, KASETSART UNIVERSITY, KAMPHAENG SAEN CAMPUS (JUN 2022 - JUN 2026)
- GPAX: 3.07

EXPERIENCE & PROJECTS

OrgChat – Organizational Chat Web App (Capstone Project)

- Developed the backend for a real-time organizational chat system using Node.js, Express, and Socket.io, integrated with a PostgreSQL database via Prisma ORM.
- Implemented user authentication and Role-Based Access Control for administrators and employees.
- Developed the frontend using Next.js and Tailwind CSS, supporting messaging, file/image, and voice/video calling integration via Zegocloud.
- Git: https://github.com/Coachzas/orgchat-project

Tomato Idea Co., Ltd. (Internship)

Email Automation & AI OCR Pipeline | DevOps (Nov 2025 – Mar 2026)

- Developed an automated email and attachment ingestion system using Node.js, Express, and Imapflow, backed by scheduled background tasks via Node-cron.
- Integrated the Google Gemini API for AI OCR to extract text from documents and images, along with an automated token cost calculation system.
- Developed the frontend using React and Tailwind CSS, featuring real-time progress updates via Server-Sent Events.
- Git: https://github.com/Coachzas/email-ai-ingestion-pipeline

AI Recruitment & Scoring System (Personal Project)

- Developed the backend using Node.js, Express.js, and PostgreSQL to manage applicant data and implemented a dynamic Job Criteria configuration system based on roles.
- Integrated AI models to parse resumes, extract key information, and perform automated criteria-based scoring for candidate evaluation.
- Developed the frontend using React, Vite, and Tailwind CSS, featuring a dashboard to track, rank, and compare candidate evaluation scores efficiently.
- Git: https://github.com/Coachzas/recruitment-system

Technical Skills

Programming Languages

- JavaScript: Developed backend APIs and database integrations.
- HTML, CSS: Designed and developed basic user interfaces for web applications.

Frameworks & Libraries

- Node.js, Express.js: Developed RESTful APIs, routing systems, and server-side logic.
- React.js: Developed user interfaces (UI), managed components, and structured web application frontends.
- Claude API / Gemini API / AI Tools: Applied AI models and assistant tools to accelerate software development workflows.

Databases & ORM

- PostgreSQL: Designed database schemas and wrote query statements.
- Prisma ORM: Managed database connections and data exchange.

Automation & Tools

- n8n: Designed automated workflow systems.
- Docker, Git, Postman: Managed containers, version control, and API testing.
